#### Inventory & MSI

The total inventory of properties available for sale as of January 2022 was 29, a difference of -17% from last month, and -52% from 60 in January 2021, and was at its lowest level compared to 2021 and 2020. #### Market Time

The average days on market (DOM) shows the number of days the average property is on the market before selling. ### Selling Price Per Square Foot

The selling price per square foot (PPSF) is a great indicator for the direction of property values. Since median & average sales prices can be impacted by the "mix" of high or low end properties in the market, the selling price per square foot is a more normalized indicator on the direction of property values.

#### Selling Price vs. Listing Price

The selling price vs. listing price reveals the average amount that sellers are agreeing to come down from their list price. The lower the ratio is below 100%, the more of a buyer's market exists, while a ratio at or above 100% indicates more of a seller's market. The January 2022 selling price vs. listing price ratio was 97.2%, compared to 101.7% last month, and 98.2% in January 2021.
