YEAR IN REVIEW 2022

Methodology

Geography covered in this report is Nassau County, Suffolk County, and the North Fork of Long Island.

Inventory is calculated based on all properties actively listed during the time period, at the time the report is prepared.

Contract Signed figures are based on publicly reported transactions at the time the report is prepared. The signed price reflects the latest available asking price.

Recorded Sales figures are based on known closings recorded at the time the report is prepared.

Median Price is the middle price of a given dataset.

Average Price is the sum of all prices divided by the total number of properties.

Months of Supply is the calculated time it would take to sell all current active listings based on the trailing 12-months sales rate.

Time on Market is calculated as the number of days from the most accurate list date of a property to its contract date.

Discount is the percentage difference between the initial list price and the recorded sale price.
